Abstract— The aim of work is to study the differences in the perception of the different level, different age group people has the different perception, different occupational people has their different perception about the relationship, this we were find while collecting data from the people. Every individual as the different perception about different kind of relationship due to the difference in gender (male female), culture also plays important role for the perception about relationship are also different. We got all this information through collection of data. The finding extended earlier studies and provide more insight into the relationship between age, relationship quality, professional environment etc.

I. INTRODUCTION

Adults have a lot different motivations to become parents, work with young people professionally, or otherwise develop and sustain relationships with them. However, few of these motivations are as strong as our perception: If we see children and youth as needing or wanting us in any way, we can pretty much justify creating, fostering, and sustaining relationships with young people.

Over the years we have reflected a lot of us perceptions of young people. We have critically deconstructed our actions and assumptions in many ways. We have also worked with others to reflect on their perceptions of young people, too. By doing this we have seen five distinct perceptions of people and youth emerge.

PERCEPTIONS OF YOUTH

Apathy – The first perception of youth is apathy. Apathy occurs when adults deliberately choice to be indifferent toward young people.

Pity – This perception of youth represents a completely top-down perspective by adults towards young people.

Sympathy – Perceiving youth with sympathy it can be alluring to adults. It allows adults to give to children and youth what they apparently cannot acquire for themselves, whether material, time, money, or otherwise.

Empathy – Reciprocity is at the core of an empathetic perception of young people. This viewpoint allows adults to see young people in a more equitable way by identifying that they are receiving something as well as giving it.

Solidarity – From a perception that does not differentiate between youth and adults there can be complete solidarity.

OBJECTIVES:

1. To study different relationship
2. To study causes, effect of bad & good relationship
3. To study effect on relationship from other sources

HYPOTHESIS:

NULL : Our perception is that youth get affected by the surrounding they stay like professional, marriage people, individual, etc.

ALTERNATIVE: Our perception is that youth don't get affected by the surrounding they stay like professional, marriage people, individual, etc.

LIMITATION/PROBLEM:

1. No proper respond while collecting the data
2. Lack of knowledge
3. Improper content
4. Lack of time

INDIVIDUAL ROLE:

	Male	Female	Total
Yes	31	36	67
No	12	21	33
Total	43	57	100

Table no.1

From the above table we can see that the individual role plays a important role in the thinking as we can see that in total 67of the individual say that there is a difference in the

perceptions of relationship and 33 of the of the total say that there is no difference in it.

CAUSES OF GOOD RELATIONSHIP:

	Male	female	Total
NO STRESS	15	19	34
RISK OF DEPRESSION	07	14	21
EXTROWORD	10	06	16
LESS SELFISH	10	10	20
FELL INVISIBLE	03	06	09
TOTAL	45	55	100

Table no.2

In the above table we can *seen that* 5 causes are being listed of the good relationship and we asked people to rate as per they want and it is being seen that if good relationship lead to the no stress we can see in table and being low rated to the feel invisible only 9.

CAUSES OF BAD RELATIONSHIP:

	Male	Female	Total
Trying to improve him/her	10	9	19
Finding fault in there fame	21	10	14
Avoiding fighting	06	23	29
Being melodramatic	04	18	22
spying	01	15	16
Total	25	67	100

Table no.3

We can see from the table that the data which is being collected from the 100 people is saying that 29 people is

maximum ,which is avoiding fighting and the lowest is 14people ,which is finding fault in there fam.

EFFECT OF BAD RELATIONSHIP:

	Male	Female	Total
Substance abuse	04	06	10
Heart disease	04	09	13
Mental health	08	10	18
Alcohol	09	19	28
Depression	17	14	31
Total	42	58	100

Table no. 4

In the above table we can *seen that* 5 effect are being listed of the bad relationship and we asked people to rate as per they want and it is being seen that if bad relationship lead to the more of depression ,we can see in table low rated to the substance abuse only 10.

MEASURES:

	Male	Female	Total
Care	24	33	57
Consoling	19	24	43
Total	43	57	100

Table no.5

The measures calculated was care and counseling in which 57 people were in favor of care and rest with counseling, which say that the person who has being in bad relationship effect need of more care and counseling which willed made them to look forward.

MINDSET OF PEOPLE CHANGE AFTER MARRIAGE:

	Male	Female	Total
Yes	24	36	60
No	19	21	40
Total	43	57	100

Table no.6

In which 24 male agree and 36 female agree on this that the people do change there thinking and way seeing things after marriage. And very less people agree that it do not change.

ESSENTIAL IN GOOD RELATIONSHIP:

	Male	Female	Total
Changing parent mindfulness	08	11	19
Child management skills	07	12	19
Relationship quality	27	35	62
Total	42	58	100

Table no.7

In which 62 people were saying “relationship quality “and rest 38 were in favour of “changing parent mindfulness & child management skills”. Which says that there is an essential “relationship quality” for a good relationship?

TRADITIONAL THINKING:

	Male	Female	Total
Yes	24	44	68
No	18	14	32
Total	42	58	100

Table no.8

From the above table we have seen that 68 people have agreed that there is a change in the traditional thinking ,they are being marching towards the modernisation of the youth, the restriction are now to a limitation and lead to a freedom .

PROFESSIONAL ENVIRONMENT:

	Male	Female	Total
Yes	22	39	61
No	21	18	39
Total	43	57	100

Table no.9

We can see that there is an effect of the professional environment in the relationship. but at what cost it is effecting and to how many people it is affecting we have seen and it is being shown in the tabular form above .this table say that 61 people do get affected by the professional environment(work load, timing,ect)and rest 39 people say it is not affecting.

CONCLUSION:

we had conducted this research to know the “perception of the youth about relationship”, what they think about the relationship like grand-parent,parent,brother-sister,daughter-son,uncle-aunty,girlfriend-boyfriend,etc& do they get affected by the surrounding they stay like groups,family,professional,after marriage, an individual,etc do all this thing affect in the perception of the youth. Does good or bad relationship with friends, family, relatives, etc affect the perception of youth and if it affect the youth than at what extend it get affected.

After conducting the research we lead to know whether know that “do surrounding affect the youth in there thinking ,way of expression, way of communication, habits, etc”.from this we also lead to know many type of perception of youth like Apathy, Pity, Sympathy ,Empathy, Solidarity.
